

Which PETs are most effective and/or promising?

Which PETs are most effective and/or promising?

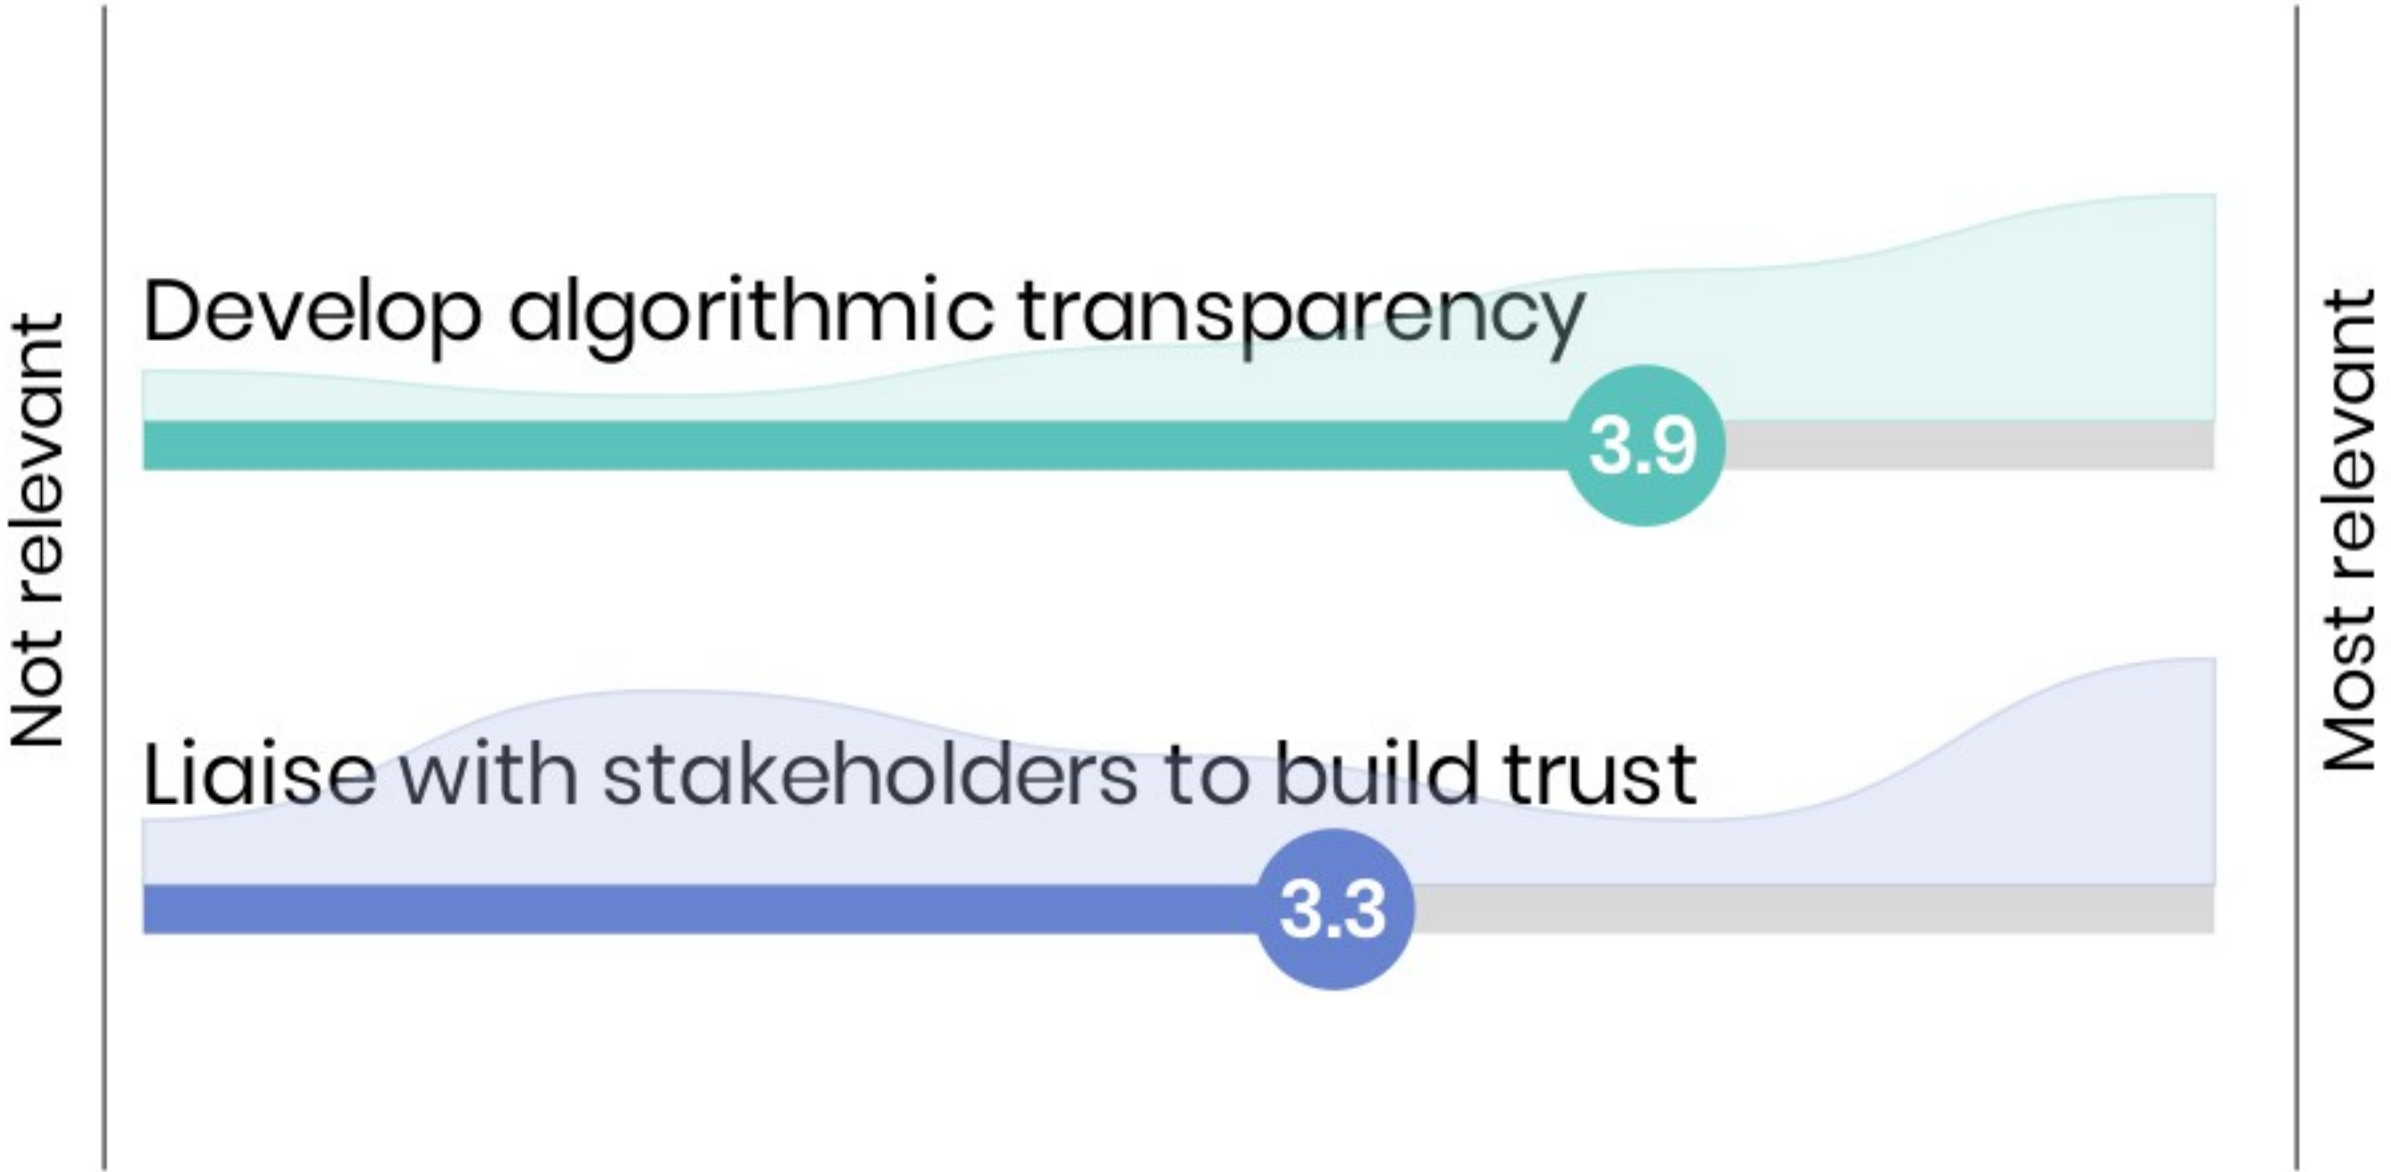

Putting privacy by design into action: Which one of the following actions is most relevant?

Focus on responsibility in data use: Which one of the following actions is most relevant?

Keep Transparency, Trust and User Control at the center: Which one of the following actions is most relevant?

What is your opinion?

Strongly disagree

Technology can guarantee the anonymisation of personal data without losing the value added of analytics

We can move from technology as the problem (violating privacy) to technology as the solution

Strongly agree
